

Learning about Forests (LEAF) encourages students to reconnect with their environment through the medium of trees, instilling in them a sense of ownership of their environment which will allow them to become advocates for the protection of their nature for the benefit of their own selves, their communities and the future generations.

The LEAF programme is implemented in 27 countries worldwide and involves over 10,000 schools and 600,000 students. Over half a million trees are planted through the programme during each academic year.

LEAF is an international programme of the Foundation for Environmental Education (FEE). To find out more about what we do please visit www.leaf.global.

LEARNING ABOUT FORESTS

Certificate of Participation

2021 / 2022

Presented to

In recognition of fulfilling the goals and objectives of the Learning about Forests programme through empowering children and young adults to be proactively engaged in safeguarding the environment for present and future generations. These actions have successfully increased the levels of environmental awareness amongst the participants, the school and the local community.
